Swimming and Boating Safety Fact Sheet (2013)

Fatalities
- 1,027 children ages 19 and under drowned in 2010.¹
  - 46% of children who drowned were ages 4 and under.¹ Drowning is the leading cause of injury-related death among children ages 1-4.¹
  - 76% of children who drowned were boys.¹
- This is a 4% increase from 2009, which had the lowest number of drowning deaths since 1999.¹

1999-2010 Drowning Fatalities and Death Rate Among Children Ages 19 and Under

Injuries
- 5,714 children ages 19 and under were seen in emergency rooms for injuries for near-drownings in 2011.¹

Additional Statistics
- Swimming pools are the most common site for a drowning to occur among children between the ages 1 and 4 years.²
- About three-quarters of pool submersion deaths occur at a home.³
- The majority of infant (less than 1 year old) drowning deaths happen in bathtubs or large buckets.⁴
- African-American children have the highest rate of drowning fatalities (1.70 per 100,000), followed by American Indian (1.37 per 100,000) and white (1.17 per 100,000). The rate of drowning fatalities among African-American children ages 5-14 years old is 2.7 times greater than the rate of white children.¹
- The use of specially-made drain covers, safety vacuum-release systems, multiple filter pumps and other pressure-venting pool filter mechanisms can reduce the risk of entrapment.⁴
- According to the U.S. Consumer Product Safety Commission, an average of 12 children under age 10 died in inflatable pools each year from 2003-2005. Because of their flexible and low sides, it may be easier for a child to climb inside of an inflatable pool.⁵ ⁶
- In 2011, 70% of all fatal boating accident victims drowned, and of those who drowned, 84% were not wearing a life jacket.⁷
- In 2011, 15 children ages 12 and under died while boating. 9 of these children died from drowning, and 7 of those children were wearing a life jacket as required by state and federal law.⁷
- 89% percent of boating deaths of all ages occurred on boats where the operator had not received boating safety instruction in 2011.⁷
- The U.S. Coast Guard requires that all children under age 13 wear a personal flotation device while on a recreational vessel.⁸ Forty-eight states, as well as the District of Columbia, Puerto Rico and the U.S. Virgin Islands, have some form of legislation that requires children to wear PFDs.⁹
- It is estimated that half of all drowning events among recreational boaters from 2000 to 2006 could have been prevented if personal flotation devices were worn.¹⁰
